

TPLUS™ YOUR COMPLETE SOFTWARE SOLUTION FOR TRANSPORT AND SUPPLY CHAIN PROCESSES No. 2.

In working with transport and supply chain organisations such as yours for the last 20 years, we have been able to help numerous clients address difficulties, problems and needs associated with their transport and supply chain processes.

Here are some of the major problems and needs that our clients currently raise:

- They need to offer signature on glass (picking signatures on glass).
- They need a hosted solution; an economical offering with all the benefits of a full transport process software solution but they don't want or can't afford the solution on site.
"Your own dedicated business system"
 Our customers want all their staff to access its features – PDAs, Emailing and Printing.
You only pay for each delivery, per transaction only. The system runs from a highly dedicated and managed hosted server at our premises.
- They need an effective web portal, web access, web booking track & trace.
- They need a handheld mobile digital assistant module with real time data communication via GPRS, HSDPA Wireless, accept new jobs, 2 way messaging, record, track & trace, sign on glass, GPS, scan barcodes, POD info and access data from Head Office etc.
- They need Allocation of Jobs to be much easier, more efficient and professional. We have helped our customers to allocate various types of jobs to their drivers by using colours and graphics, and drag and drop capability, thus providing a snap-shot of the fleets' position.
- They need an onsite transport software solution.
- They need B2B facilities in their software to receive jobs from other computer systems.

Here are some of the many other problems and needs that TPLUS™ has already helped clients with:

- TPLUS™ has enabled organisations to not only handle every daily needs but so much more.
- TPLUS™ ensures that your organisation efficiently, effectively and professionally runs your daily transport operations no matter what kind of process you do.
- TPLUS™ enables both drivers and Head Office to effectively manage the transport processes.
- TPLUS™ gives you the flexibility, integration and reliability to efficiently configure your own specific requirements.
- TPLUS™ offers you cutting edge technology, innovative solutions and a great personal business relationship with the highest standard of ongoing service and support.
- TPLUS™ provides you with the complete software solution for transport processes.
- TPLUS™ functionality is rich, friendly and streamlined making your daily transport processes efficient, effective and easy to use.
- No matter what solution you choose you will always enjoy all the benefits of a full transport and supply chain software solution – TPLUS™.
- Furthermore, you will receive our unparalleled level of service and ongoing support.

Please feel free to check our customer references, testimonials and case studies on the following page. And allow us to demonstrate how effectively TPLUS™ can answer all your transport needs.

OSC MISSION STATEMENT:

"Keeping customers at the cutting edge with tomorrow's solutions today."

Our commitment to our mission statement is achieved by maintaining a personal relationship with our clients and using highly qualified, experienced professional staff to deliver tested and proven leading edge software and hardware solutions backed by the highest standard of ongoing service and support.

OSC HISTORY:

- We have nearly 20 years' experience in Software for the Courier and Transport Logistic Management Processes Industry.
- Maintaining a personal relationship with our clients and using highly qualified, experienced professional staff to deliver tested and proven leading edge software and hardware solutions. Backing this with the highest standard of service and support.
- Over the years we have had the privilege of watching fledging companies blossom into highly competitive enterprises in large part because of our innovative and imaginative software.

"Success for our clients is success for us" - Nothing speaks louder than results!

SOME OF OUR CLIENTS:

Fairfax, Telstra, Ikea, Target, Castrol, Capital Transport, All Purpose Transport, Kings Transport ... there are many more - nothing speaks louder than results.

TESTIMONIALS:

"The new system exceeded our expectations and any issues were quickly identified and rectified and there was minimal effect on our day to day operations during the changeover phase".

Paul Kahlert, APT Services.

"Our drivers love 2 way messaging provided by TPLUS Mobile. Not only is it easier to use and small enough to fit into their pockets but there is no need for run sheets and no lost time waiting for installation. There are fewer maintenance issues than with radio; better coverage and staff can contact drivers more easily. Signature on Glass delivers a huge advantage in time saved because there is less need for Head Office to view signatures. There have been no complaints from drivers about the new system.

Lucy MacMillan ANC, NSW.
