TPLUS™
Hosted Solution

SIMPLICITY, SECURITY & SAVINGS for Couriers & Transport Companies

When you connect to the TPLUS™ HOSTED SOLUTION you:

1. Receive the benefits & functionality of TPLUS™ Complete Transport Management System
2. Use PDA's through OSC's VPN
3. Display your company logo and business details

And … YOU ONLY PAY FOR EACH DELIVERY

Our **HOSTING SOLUTION** provides you with your own private system; it is totally dedicated to your business; and there's no limit to the number of your staff who can access its features. PDA's, emailing and printing are all supported through the HOSTING via OSC's VPN throughout Australia.

All you need is a fast ADSL Internet Connection

The complete software runs from Open System's managed servers and you could be up and running within 2 weeks. **And … you only pay for each delivery !!**

Delivery Charges

Payment per delivery is based on a minimum number of jobs per day with a cost per delivery. Exact figures will depend on your company's fleet, number of clients and expected business and will be determined and discussed when you contact OSC.

A Snapshot of Some of the Benefits

When you connect to our HOSTING SOLUTION you have access to all the TPLUS features and benefits; some are briefly described below. You can access comprehensive details on our website www.besttransportsoftware.com.au.

TPLUS™ enables you to reduce costs because it utilizes web bookings, web labels, remote printing, B2B links and Track & Trace. Web bookings and Track & Trace are supported through OSC's web presence.

Your customers/computers do the work, not your staff. Hot keys save time in accessing options and facilities and the simple but clever design saves time and enables you to quickly access data.

Bookings

You can enter bookings by many real-time data entry methods via the user-friendly Job Bookings window. A simple booking request would use less than 12 keystrokes. Jobs can be booked as permanent and performed by any combination, eg, day of the week, number of times, normal or special price, etc.

Multi-Map DESPATCH

This NEW, integrated tracking software delivers enhanced simplicity, cost savings and speeds up deliveries. What does INTEGRATED mean? As you click on work areas, drivers and other facilities the multi-maps give you different visual representations of your work which allows for a much quicker and informed allocation.

The integrated maps, multi-screens, and colour co-ordinated drop-down lists managing dispatch just became simpler, far quicker and much less stressful. A dispatch operator is now able to do their daily allocation of jobs, and at the same time easily, rapidly and successfully locate each driver's position, trace their driving trails, and track their past and future deliveries.

Multi-Map DESPATCH offers amazing business and people benefits, so clients can achieve lower ownership costs, time savings, improved productivity and higher profits.

Your Own Web Portal

TPLUS™ `provides you with your own web portal so that your clients can make bookings and/or track & trace their jobs through your web page.

Driver Maintenance

The complete driver pay module and maintenance allows you to search by name or driver's ID, it includes all personal details, allowances and deductions, full GST compliance and all other necessary details.

Price Schedules

Depending on your need, TPLUS™ can calculate price by a simple or complex pricing formula. Simple pricing formula is based on distance, time, volume, and weight, pieces, flat or cubic. Complex pricing formula includes other variables, eg, stepped pricing, zone pricing, suburb pricing.

Financial & Reporting

Almost all of your reporting requirements will be covered in this module which includes a payment and journal entry module. Reports include Driver's Daily Report, Active Driver Summary, Client Balances, Job Analysis, Trial Balance, etc.

TPLUS™ HOSTED is ideal for:

Smaller couriers

Small mobile workforce businesses

Companies who wish to experience the TPLUS™ benefits before deciding to purchase

Companies who don't want too many servers on their premises
