

# TPLUS™ Transport Software Solution

**A PROUD AUSTRALIAN-MADE TRANSPORT AND SUPPLY CHAIN  
SOFTWARE SOLUTION THAT CAN HELP YOU MAKE 2012 A  
GREAT YEAR FOR YOUR TRANSPORT ORGANISATION!**

Over the years TPLUS™ has had the privilege of watching our young and progressive Australian clients grow into highly competitive enterprises. This is in large part because of our original and imaginative transport and supply chain software.

Our simple and honest key strategy has been to maintain a personal and friendly relationship with our clients using highly qualified, experienced and professional staff. We deliver tested and demonstrated, leading edge software and hardware solutions which are backed with the highest quality of service and support.

The TPLUS™ software solution has enabled organisations to run transport processes efficiently, effectively and professionally. Furthermore TPLUS™ gives our customers the flexibility of integration to their own specific requirements, rich functionalities, drastically reduced costs, increased productivity and as a consequence being able to offer their own customers the highest quality service levels.

When you consider TPLUS™ software solution for your organisation you'll immediately discover how our successful track record will make you feel at ease. Not only have Australian transport companies been getting the most out of our functionalities, modules, solutions and systems, but these organisations have also achieved total control over their transport processes.

Including benefits like:

- Mobility solutions – Handheld mobile personal assistant, wireless PDA
- Real time track and trace of clients' items/POD info; updates via internet wireless; 2 way messaging, driver position tracking and current job booking status via wireless internet.

- Signature on glass; collection of signatures; allocation of jobs to drivers; scan barcodes; access data from Head Office.
- With Web track & trace; placing jobs electronically (B2B systems support a soap, xml, csv, ftp, ssl).
- Hosted software solution or software solution onsite - at client's premises.
- Increased staff productivity through leading edge electronic transport software solution.

Today many business organisations are looking for ways to increase their performance against the competition. As well they are searching for a friendly, cost effective and easy to manage software solution for their transport and supply chain processes. They need look no further than TPLUS™ complete transport software solution for outstanding benefits that can fulfil all these requirements.
